Blockchain Security

INFOSEC.

Aug 22, 2024

David José Araújo Ferreira

has successfully completed the online, non-credit Specialization

Blockchain Security

This specialization introduces blockchain security, including a description of how the blockchain works at each level of the blockchain ecosystem. Learners will be able to explain everything from fundamental cryptographic primitives to the nodes and networks that make up the blockchain ecosystem to the security of smart contracts and advanced cryptography in blockchain.

Howard Poston
Security Trainer and
